

# FOOD-PROCESSING LUBRICANTS

## Features & Benefits

Sumoil offers a full line of lubricants for food-processing facilities that cover the most common equipment seen in a plant. These lubricants are designed for optimum equipment operation, efficiency, and longevity.

-  **Food-Grade**  
Meets NSF H1 or HT1 requirements for incidental food contact
-  **Low-Temperature**  
Sumoil's low-temperature formulations keep flowing in extremely cold conditions for consistently superior performance and increased energy efficiency
-  **High-Temperature**  
Sumoil's high-temperature formulations are exceptionally resistant to thermal and oxidative breakdown, preserving viscosity and preventing the buildup of varnish and carbon deposits to maintain optimal operating efficiency

## Air Compressor Lubricants

Product	Description	Product Type	Attribute
<b>SFG</b>	8,000 Hour Food-Grade Compressor Lubricant	  	Long-life lubricant ideal for harsh/high-temperature conditions

## Chain Lubricants

Product	Description	Product Type	Attribute
<b>2285</b>	Synthetic Food-Grade High-Temp Chain Lubricant	  	High-temperature bakery ovens
<b>6831</b>	Synthetic Food-Grade Low-Temp Chain Lubricant	  	Spiral and blast freezer systems or other low-temperature chain applications

## Gear Fluids

Product	Description	Product Type	Attribute
<b>SGL-FG</b>	Synthetic Food-Grade Gear Fluid	  	High viscosity index for protection at elevated temperatures

# FOOD-PROCESSING LUBRICANTS

## Greases

Product	Description	Product Type	Attribute
<b>2087</b>	Synthetic Food-Grade EP Aluminum Complex Grease	  	Provides excellent thermal & oxidative resistance, resists water washout and decomposition under wet conditions

## Heat Transfer Fluids

Product	Description	Product Type	Attribute
<b>Caldera 3</b>	Food-Grade Heat Transfer Fluid	  	HT1 food-grade without compromising performance or fluid life
<b>Caldera 5</b>	High-Flash Food-Grade Heat Transfer Fluid	  	High-flash food-grade heat transfer fluid designed for applications where the operating temperature must be below the flash point of the fluid
<b>Caldera 12</b>	Food-Grade Low-Temperature Heat Transfer Fluid	  	Ideal for low-temperature operations down to -40°F (-40°C) and rated for applications up to 450°F (232°C)
<b>Caldera 17</b>	Food-Grade Heat Transfer Fluid & Cleaner	  	Designed to soften, dissolve, and suspend carbon and varnish deposits within heat transfer systems
<b>Caldera 19</b>	Food-Grade Low-Temperature Heat Transfer Fluid & Cleaner	  	Designed to soften, dissolve, & suspend carbon & varnish deposits within low-temperature heat transfer systems

## Hydraulic Fluids

Product	Description	Product Type	Attribute
<b>GEHF-FG</b>	Synthetic Food-Grade AW Hydraulic Fluid	  	Provides a long fluid life and excellent wear protection
<b>4584</b>	Synthetic Fire-Resistant Food-Grade Hydraulic Fluid	  	Exceptional oxidative stability, corrosion resistance and anti-wear properties make it well-suited for fire-resistant applications

## Refrigeration Compressor Lubricants

Product	Description	Product Type	Attribute
<b>R717AC-FG</b>	Food-Grade Ammonia Refrigeration Compressor Fluid	  	Food-grade version of NXT 717

## Vacuum Pump Fluids

Product	Description	Product Type	Attribute
<b>SVAC-FG</b>	Synthetic Food-Grade Vacuum Pump Fluid	  	Excellent sealing capabilities, long fluid life
