

## GULF-O-FLEX FLEXIBLE DUCT

### PRODUCT DESCRIPTION

#### Flexible Duct

Our Flexible Duct comes in a variety of styles which is used in construction for the purpose of air-handling thus, providing the most economical solution.

#### Construction

Inner Duct	:	2 - Aluminium, 2 - Metalised Polyester
Nominal Thickness Of Inner Duct	:	70 micron
Jacket Construction	:	1 – Metalised Polyester, 1 – Polyester
Nominal Thickness Of Jacket	:	40 micron
Length	:	7.5 Meter
Available Diameters	:	Ø 100mm – Ø 300mm

Above specs defined for un-insulated flexible duct.

But in insulated Flexible Duct, one factor will be added as following:

Insulation	:	25mm Fiberglass Wool x 16 kg/m <sup>3</sup> Density
------------	---	-----------------------------------------------------

#### Performance Data

Temperature Range	:	-30°C to 150°C
Air Velocity	:	25 m/s (max)
Operating Pressure	:	2500 Pa (max)
